

BURBANK WATER AND POWER

MISSION STATEMENT

Our mission at Burbank Water and Power (BWP) is to provide electric and water services to our customers in a safe and reliable manner while providing stable and competitive rates.

ABOUT BURBANK WATER AND POWER

The **Power Supply Division** is responsible for BWP's supply of electricity. The Division develops, operates, participates in, and builds facilities for the generation and delivery of energy to Burbank. The Division also acquires power from a diverse number of resources including wind, solar, hydro, natural gas, coal, and nuclear from facilities throughout the West. Much of the development is done through the Southern California Public Power Authority (SCPPA) for better economics. In June 2007, the City of Burbank established a goal to secure 33 percent of its electricity from renewable energy resources by 2020. This goal was achieved in 2015, five years early, and now the Division is focused on compliance with Senate Bill 350, which mandates even greater renewable content. The Division operates the Magnolia Power Project (MPP), a SCPPA project located at the BWP site, the Tieton Hydropower Project, a SCPPA project located in Washington state, as well as BWP's wholly-owned local generation resources. The Division conducts the City's wholesale power marketing efforts to minimize the cost of power through energy purchases and sales with other energy companies.

The **Electric Services Division** is responsible for the planning, engineering, construction, testing, operation, and maintenance of electric stations, power lines, service drops, and meters. This Division also improves and maintains the City's street lighting system (Fund 129), maintains electrical facilities for power plant and water facilities, and installs fiber-optic lines.

The **Water Division** is responsible for the planning, engineering, construction, operation and maintenance of the City's potable water production, treatment, boosting, storage, and the distribution facilities for both the potable and recycled water systems. The distribution facilities include water mains, services, meters, valves, and fire hydrants. The Division acquires 80 percent of its potable water (both treated or untreated) from the Metropolitan Water District of Southern California.

The **Customer Service Division** provides customer assistance related to all municipal services accounts, including requests for new service, general account, billing and payment information. This Division also provides community support and educational outreach focusing on water and energy conservation, environmental stewardship, and the community's youth.

The **Finance Division** is responsible for financial planning and analysis, financial reporting, budgeting, energy risk management, ratemaking, ensuring access to capital markets, and accounting and reporting for the Magnolia Power Project and Tieton Hydropower Project. The Division is also responsible for the internal controls for BWP, which ensure the integrity of financial information regarding department operations and support operations for the other divisions including warehousing and fleet maintenance.

The **Technology Division** oversees security, telecommunications, systems, applications, fiber services, and the systems modernization program for the utility. The Division provides strategic oversight and alignment of technology systems with BWP's needs. This Division supports and maintains the City's radio and telephone systems (Communications Fund 535) and all physical and cyber security for the utility, including aspects of NERC-CIP (North American Electric Reliability Corporation - Critical Infrastructure Protection). The Division manages BWP's mission critical systems, networks, and wireless infrastructure including the ONE Burbank enterprise fiber-optic services, and operational software comprising customer information systems, metering head-end and supervisory control and data acquisition systems.

BURBANK WATER AND POWER

2017-18 WORK PROGRAM HIGHLIGHTS

- Replaced 200 power poles and replaced or rehabilitated four deteriorated underground electric vaults to maintain the reliability of BWP's electric system and ensure the safety of our customers and employees.
- Installed four new recycled water fire hydrants for street sweeping, tree maintenance, and construction water, reducing potable water demand and our reliance on Metropolitan Water District (MWD) purchased water.
- Replaced 25 obsolete potable fire hydrants (replacement parts unavailable) to increase reliability, safety and maintain insurance ratings.
- Introduced new customer engagement tool to provide cohesive, consistent look and navigation through the BWP's website.
- Replaced landfill generators, a renewable resource.
- Developed electric vehicle charging program to encourage charging at the workplace for large employers.

2018-19 WORK PROGRAM GOALS

- Replace 200 power poles and replace or rehabilitate four deteriorated underground electric vaults to maintain the reliability of BWP's electric system and ensure the safety of our customers and employees.
- Install four new recycled water fire hydrants for street sweeping, tree maintenance, and construction water, reducing potable water demand and our reliance on Metropolitan Water District (MWD) purchased water.
- Replace 25 obsolete potable fire hydrants (replacement parts unavailable) to increase reliability, safety and maintain insurance ratings.
- Replace landfill generators, a renewable resource.
- Install 25 electric vehicle chargers in public areas to electrify the transportation sector in Burbank, and integrate renewable energy into BWP's power supply.
- Construct a new 69 kV to 12.47 electric substation at the corner of Winona and Ontario Avenue (Ontario Substation) to maintain system reliability and improve system efficiency.
- Construct new 69 kV subtransmission and 12.47 kV substructure including duct banks, manholes, and power cable for delivering power from Ontario Substation to BWP's customers.
- Replace 1,000 high pressure sodium (HPS) streetlights with LED luminaires to extend their life expectancy and reduce energy consumption.

Electric Fund

496

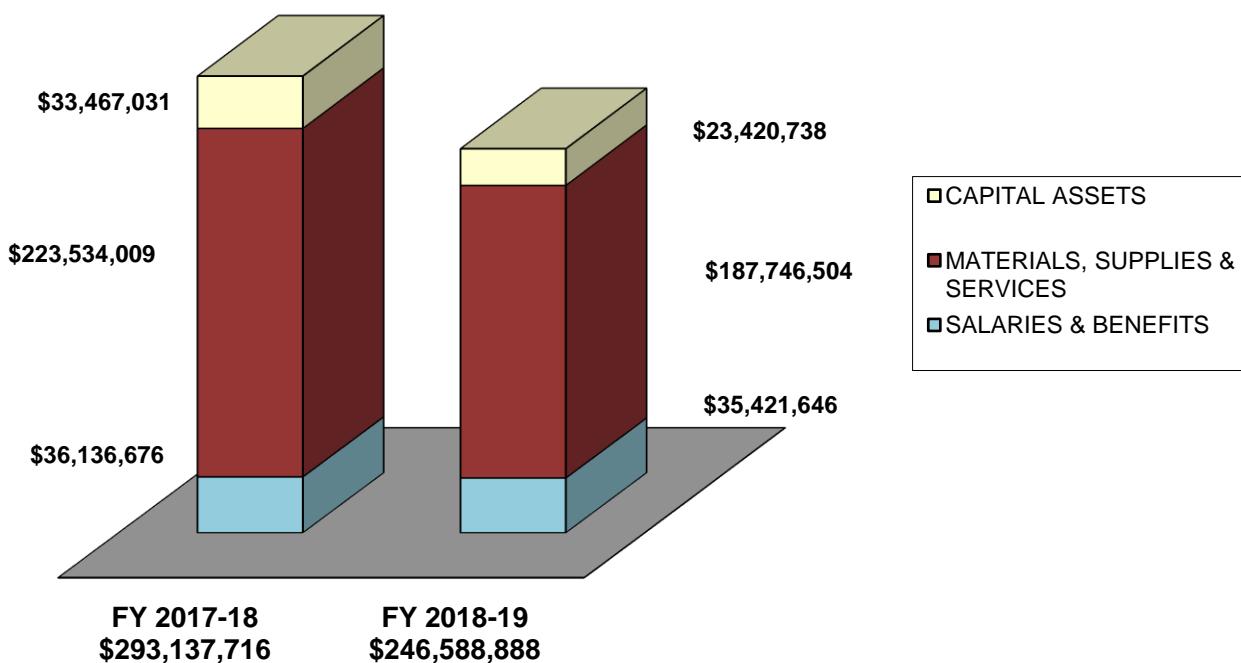

The Electric Fund supplies and distributes to the City of Burbank and its consumers electricity that is reliable, sustainable and cost efficient. The Electric Utility strives to keep rates competitive, while providing sufficient funding for operations and maintenance, including covering the rising costs of energy and providing funds for system reliability and capital improvements.

Water Fund

497

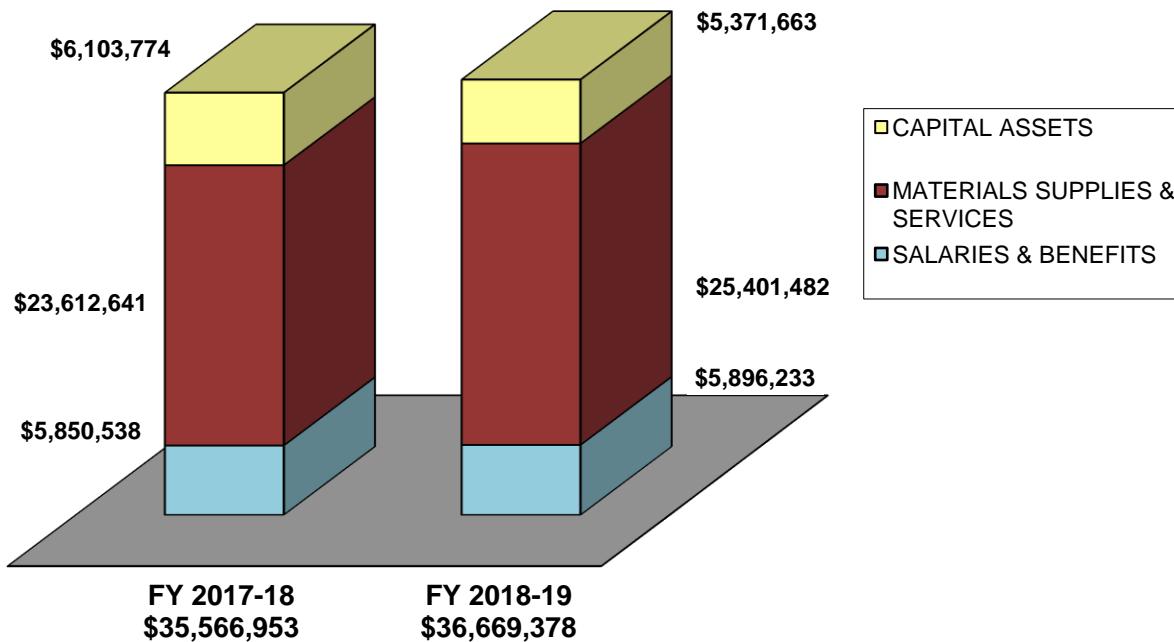

The Water Fund supplies potable and recycled water to the City of Burbank and its customers. The Water Utility is committed to providing safe drinking water reliably at competitive rates, promoting sustainability, and drought proofing a portion of the water supply by investing in the Recycled Water System.
